Good Morning Bill,
My apologies for the delay in responding to your inquiry. The departments Traffic Engineering and Safety unit is wrapping up it's study of this intersection and will be forwarding me it's recommendations for addressing the concerns we had spoke about during our meeting last fall. I will keep you informed when I receive those recommendations.

Thank you for your patience.

Hi Jerry,

Is there any update to report?

Thx, Bill

Good afternoon Bill,

I have had not heard from our Traffic Engineering and Safety Unit as of yet.

The Traffic Engineering and Safety unit is also responsible for reviewing this regions Highway Design departments plans and proposals as well as overseeing our Construction departments maintenance and protection of traffic for ongoing projects, add to this responding to requests such as this one from both private and local governments and there human resources, at times, tend to get stretched a bit thin.

I will forward any information I receive to you as quickly as possible.

Hi Gerry,

Is there any new developments?

Bill

Subject: rt 7 / Pony Farm Rd intersection

Hi Gerry,

Thank you for meeting with Ed & me to look at this intersection.

We look forward to working with you towards resolution that will improve the safety of this intersection.

Bill
